

**§23.12 Wording, purpose, and use of approval plate.**

(a) *Approval plate.* (1) Manufacturers shall attach, stamp, or mold an approval plate on each permissible device. The plate shall bear the emblem of the Mine Safety and Health Administration and be inscribed as follows:

Permissible Telephone (or Permissible Signaling Device) Approval No.——Issued to the \_\_\_\_\_ Company.

(2) When deemed necessary, an appropriate caution statement shall be added. The size and position of the approval plate shall be satisfactory to MSHA.

(b) *Purpose.* The approval plate is a label that identifies the device so that anyone can tell at a glance whether or not it is of the permissible type. By the plate, the manufacturer can point out that his device complies with MSHA's requirements and that it has been approved for use in gassy or dusty mines.

(c) *Use.* Permission to place MSHA's approval plate on his device obligates the manufacturer to maintain the quality of his product and to see that each device is constructed according to the drawings that have been accepted by MSHA and are in MSHA's files. Devices exhibiting changes in design that have not been authorized are not permissible and must not bear MSHA's approval plate.

[Sched. 9B, 4 FR 1555, Apr. 11, 1939, as amended at 43 FR 12315, Mar. 24, 1978]

**§23.13 Withdrawal of approval.**

MSHA reserves the right to rescind for cause at any time any approval granted under this part.

**§23.14 Instructions for handling future changes in design.**

All approvals are granted with the understanding that the manufacturer will make his device according to the drawings that he has submitted to MSHA and that have been considered and included in the approval. Therefore, before making any changes in the design he shall obtain MSHA's authorization of the change. The procedure is as follows:

(a) The manufacturer shall write to Approval and Certification Center, Box

201B, Industrial Park Road, Dallas Pike, Triadelphia, W. Va. 26059 requesting an extension of his original approval and stating the change or changes desired. With this request, he should submit a revised drawing or drawings showing the changes in detail, together with one of each of the parts affected.

(b) MSHA will consider the application and inspect the drawings and parts to determine whether it will be necessary to make any tests.

(c) If no tests are necessary, and the change meets the requirements, the applicant will be officially advised by MSHA that his original approval has been extended to include the change.

(d) If tests are judged necessary, the applicant will be advised of the material that will be required. In this case extension of approval will be granted upon satisfactory completion of the tests and full compliance with the requirements.

[Sched. 9B, 4 FR 1555, Apr. 11, 1939, as amended by Supp. 1, 20 FR 2975, May 4, 1955; 43 FR 12315, Mar. 24, 1978; 52 FR 17514, May 8, 1987]

**PART 26—LIGHTING EQUIPMENT FOR ILLUMINATING UNDERGROUND WORKINGS**

Sec.

26.1 Purpose.

26.2 Definitions.

26.3 Consultation.

26.4 Type of equipment that may be granted certificates of approval for permissibility.

26.5 Components that may be certified.

26.6 [Reserved]

26.7 Tests and investigations.

26.8 Applications.

26.9 Specifications; all types of lighting systems.

26.10 Specifications; intrinsically safe lighting fixtures.

26.11 Specifications; explosion-proof lighting fixtures.

26.12 Specifications; cable connectors.

26.13 Specifications; portable cables.

26.14 Conduct of investigations and demonstrations.

26.15 Certificate of approval for permissibility.

26.16 Certification of components.

26.17 Approval plate for permissible lighting systems.

26.18 Markings for certified components.

26.19 Changes after certification.

26.20 Withdrawal of certification.
